A Service of **Merchant Services Network**®

Virtual Terminal Solution

My Merchant Gateway Payment Server is a multi-tasking solution for processing retail transactions on your PC. This software provides a fast, easy, reliable way to authorize credit cards, ATM/debit cards, and EBT transactions. It can integrate with your website for automated recurring credit and debit acceptance and with the use of an integrated shopping cart, your website can process, authorize, capture and confirm selection, payment and shipping information.

The administrator users can manage their accounts with little more than a few keystrokes and mouse clicks. Through an intuitive graphical user interface, an administrator can set up new accounts and modify or delete existing ones. In turn, merchants can upload POS transactions from their terminals and capture images of signed sales drafts. As a result, merchants no longer have to hold copies of these transactions for retrieval requests. Instead, the images are housed on the web and available to the merchant by using a web browser. Additionally, merchants also have access to manage accounts at the user level within their merchant accounts. This versatility not only supports a wide level of account management, but also reduces the need for administrator involvement in routine and simple adjustments to the merchant account.
